

**APPENDIX A-1: Comb Cemetery Inventory by Quadrangle Map:  
Locations, Numbers of combs, Notes**

NB: GPS set for NAD 27 datum (same datum used for topos)

NB: \* indicates lat-long measured from the quads, not on-site GPS readings.

First number after quad name = number of comb cemeteries in quad, based on numbers in ( ), i.e., sum of number of cems with extant combs + number of cems with only ex-combs. Cems with only “possible” ex-combs listed but not included in comb cem total for quad (there are 13 such cems listed).

Ex-comb cems listed in blue.

Number of extant combs, used to calculate total extant combs in Tennessee (2011-2021) given in brackets [ ]

UID = Unidentified cemetery, no basis on which to name.

If you know of any Tennessee comb cemetery not included in this list, please contact the author at [rfinch@graterutabaga.com](mailto:rfinch@graterutabaga.com)
